mwworkstation.com

1 **Height adjustment** / Control rod on the left hand side of mechanism

To raise the seat, shift your weight to your feet. Engage actuator. Chair will rise automatically. On the contrary, pull the handle and use your body weight to lower the seat

Adjust your feet flat on the ground and bend your thighs to 90 degrees to make your body comfortable and reduce fatigue from sitting for a long time.

2 **2D Movable armrests** / Buttons under the armrest pads on both sides

Push-pull armrest pad slides forward and backward

Press the button under the armrest to adjust the height

Proper armrest position can reduce hand and shoulder fatigue.

3 **Tilt lock & Control** / right hand side of mechanism

Pull the handle to unlock, tilt to the fixed position and then pull the handle to lock

The tilt angle can be adjusted to suit your personal sitting posture, switch working or resting states to achieve the best comfort experience.

4 **Lumbar control support** / Lumbar control behind the seat

Pull up or down the lumbar support by both hand at the same time

Proper lumbar support can reduce discomfort when you sit for long time

Cleaning And Maintenance Methods

Leather office chair:	Please gently wipe it with a half-wet sponge dipped with special detergents and service it with the leather servicing agent after wiping it dry with the dry cloth. If it is dipped with water, it should be immediately wiped dry. Besides, avoid the long-time direct sunlight.
Net surface and cloth office chair:	Please slap with hand or use the dust collector to clean the dust on it. If there are stains, locally clean and dry it naturally with special detergents.
Armrest, support and chair leg:	For aluminum alloy materials, please clean them with a dry cloth or nonferrous metal detergents; For plastic materials, please clean them with half-wet cloth dipped with clear water.
Chair wheel:	Clean fur crumbs fiber and other sundries periodically and protect chair wheels with anti-static sprays.
