DETAILED DESIGN

Detailed display

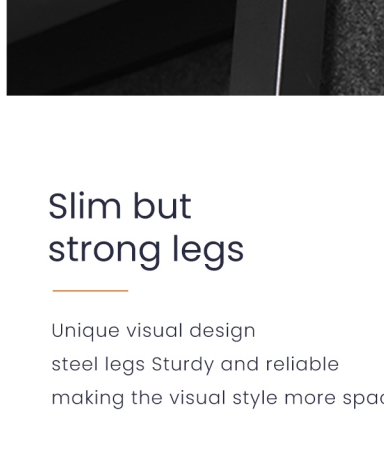

Environmentally friendly
noisereducing material wiring system

Slender when viewed from the front
but strong when viewed from the side

Unique "arch" structure

VOLTA refers to the distinctive "arch" architectural structure

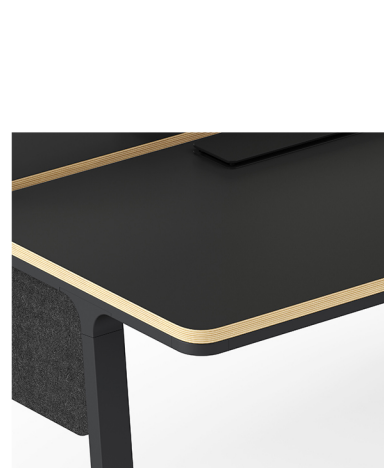

Slim but strong legs

Unique visual design
steel legs Sturdy and reliable
making the visual style more spacious

Graceful lines

Incorporating novel, light arcs into
the table legs, central toolbar, desktop
edges and other areas creates a unique and
contrasting sense of power and lightness

PET Hanging board

This material itself has very good flame
retardant properties, and can also increase
the absorption of noise in the environment,
providing a safer and more comfortable
communication environment.

COLOR ATCHING

More combinations make the office
environment comfortable and relaxed
